Home from Hospital Service

On being told we can be discharged from hospital, our first reaction is one of relief and happiness, we can go home.

However for many older people and their families, this is followed by concern as to how our homecoming will be managed, how will the first few days work out, will I be able to do everything I did before I went in?

Periods of time in hospital can take away our confidence as to how we will cope on returning home, how independent will we be?

Convalescent care offered at a time when we are recovering from an illness, an operation or an injury, within our own home can enables us to make a quicker and safer recovery in the place where we are most happy, our own home. Former independence can be regained safely and without anxiety.

Able Community Care’s Home from Hospital Service offers a Live-in Carer to help with domestic tasks, offer assistance with personal care and offers you and your family the security of knowing that help is at hand twenty four hours a day until you are well enough to manage on your own.

Once you have a discharge date your Live-in Carer can be in place to welcome you home from hospital or can arrive after you have settled in.

Able Community Care was established in 1980 and since that time has provided 55 million hours of live-in care packages. Care packages which have enabled people to enjoy living in their own home with support and companionship.

All our Live-in Carers have a minimum of one year’s experience in the provision of care and all our Live-in Carers have an up to date DBS (formerly Criminal Record Check).

Our Care Workers are interviewed by us, face to face, we have obtained written references for each one and all references are checked upon receipt for validity.

The Home from Hospital Service is available nationwide and in the Channel Islands.
